PROFILE

Aspiring Junior Software Engineer with a strong foundation in Python, Java, and C/C++, and a genuine curiosity for software development and emerging technologies. Comfortable working independently on complex technical problems, I bring an engineering mindset and a strong willingness to learn to every project. I am looking for an opportunity to grow within a development team and contribute with concrete results from day one. I enjoy taking on new technologies and bringing fresh ideas to the team.

EDUCATION

Nov 2022 — Apr 2026

Bachelor's Degree in Computer Engineering, University of
Modena and Reggio Emilia

Mantua

Computer Engineering (D.M. 270/04) - Mantua campus. Final grade: 97/110. EQF Level: 6. NQF Level: First-cycle degree (3 years). Thesis: OPC UA-MQTT Integration for IIoT Monitoring and Traceability in Industry 4.0 Scenarios. Main topics and skills: industrial communication protocols (OPC UA, MQTT) and IIoT architectures; asynchronous Python programming (asyncio, asyncua, asyncpg); middleware integration with Node-RED; relational database management with PostgreSQL; cyber-physical systems and the Industry 4.0 paradigm; industrial automation with Siemens S7-1500 PLCs; real-time process data collection and analysis; passive traceability of production systems.

Sept 2017 — Jun 2022

Technical and Economic Diploma, Giuseppe Luosi Upper
Secondary School

Mirandola

Technical and economic track, with a focus on Business Administration, Finance and Marketing, and Information Systems.

SKILLS

Programming Languages:
